

## Microsoft ODBC Driver for SQL Server – Linux (RedHat, Ubuntu, SUSE) Install Instructions

### Ubuntu 16.04

```
sudo su
sh -c 'echo "deb [arch=amd64] https://apt-mo.trafficmanager.net/repos/mssql-ubuntu-xenial-
release/ xenial main" > /etc/apt/sources.list.d/mssqlpreview.list'
sudo apt-key adv --keyserver apt-mo.trafficmanager.net --recv-keys 417A0893
apt-get update
apt-get install msodbcsql unixodbc-dev-utf16
#for silent install use ACCEPT_EULA=Y apt-get install msodbcsql
apt-get install unixodbc-dev-utf16 #this step is optional but recommended*
```

### Ubuntu 15.10

```
sudo su
sh -c 'echo "deb [arch=amd64] https://apt-mo.trafficmanager.net/repos/mssql-ubuntu-wily-release/
wily main" > /etc/apt/sources.list.d/mssqlpreview.list'
sudo apt-key adv --keyserver apt-mo.trafficmanager.net --recv-keys 417A0893
apt-get update
apt-get install msodbcsql
#for silent install use ACCEPT_EULA=Y apt-get install msodbcsql
apt-get install unixodbc-dev-utf16 #this step is optional but recommended*
```

### Ubuntu 15.04

```
sudo su
sh -c 'echo "deb [arch=amd64] https://apt-mo.trafficmanager.net/repos/mssql-ubuntu-vivid-release/
vivid main" > /etc/apt/sources.list.d/mssqlpreview.list'
sudo apt-key adv --keyserver apt-mo.trafficmanager.net --recv-keys 417A0893
apt-get update
apt-get install msodbcsql
#for silent install use ACCEPT_EULA=Y apt-get install msodbcsql
apt-get install unixodbc-dev-utf16 #this step is optional but recommended*
```

## RedHat 7

```
sudo su
yum-config-manager --add-repo https://apt-mo.trafficmanager.net/yumrepos/mssql-rhel7-release/
yum-config-manager --enable mssql-rhel7-release
wget "http://aka.ms/msodbcrlhelppublickey/dpgswdist.v1.asc"
rpm --import dpgswdist.v1.asc
yum remove unixodbc #to avoid conflicts during installation
yum update
yum install msodbcsql
#for silent install use ACCEPT_EULA=Y yum install msodbcsql
yum install unixODBC-utf16-devel #this step is optional but recommended*
```

## RedHat6

```
sudo su
yum-config-manager --add-repo https://apt-mo.trafficmanager.net/yumrepos/mssql-rhel6-release/
yum-config-manager --enable mssql-rhel6-release
wget "http://aka.ms/msodbcrlhelppublickey/dpgswdist.v1.asc"
rpm --import dpgswdist.v1.asc
yum remove unixodbc #to avoid conflicts during installation
yum update
yum install msodbcsql
#for silent install use ACCEPT_EULA=Y yum install msodbcsql
yum install unixODBC-utf16-devel #this step is optional but recommended*
```

## SUSE12

```
sudo su
zypper ar https://apt-mo.trafficmanager.net/yumrepos/mssql-suse12-release/ "mssql" #To add the
repo
wget "http://aka.ms/msodbcrlhelppublickey/dpgswdist.v1.asc"
rpm --import dpgswdist.v1.asc
zypper remove unixODBC #to avoid conflicts
zypper update
zypper install msodbcsql
#for silent install use ACCEPT_EULA=Y zypper install msodbcsql
zypper install unixODBC-utf16-devel #this step is optional but recommended*
```
